Products and Services

Products :

Probiotics powder Yoghurt starter cultures

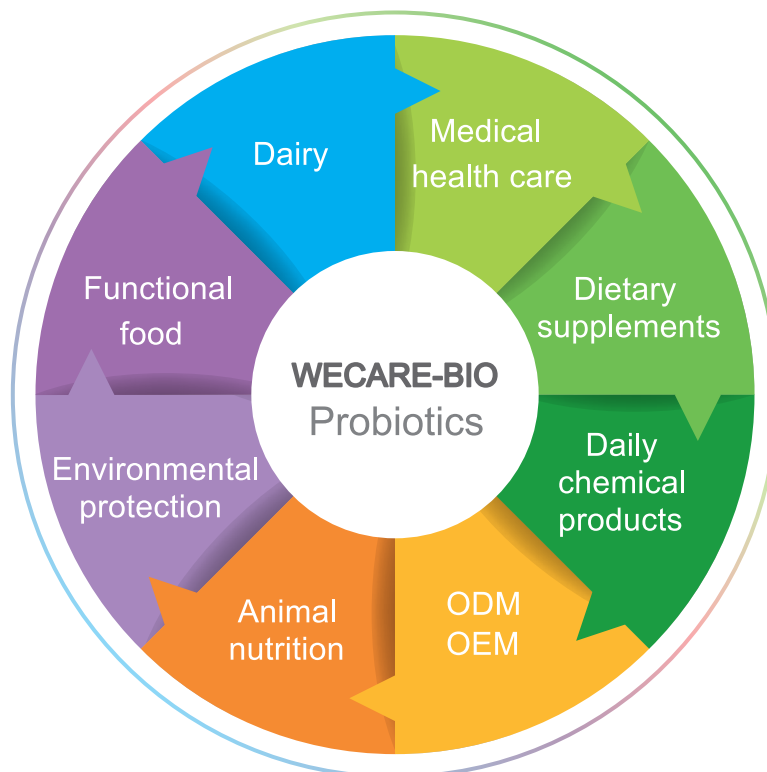

OEM/ODM (Powder、 Granule、 Table、 Capsule)

Probiotic flavored powder Biological protective agent

Inactivation type of probiotic cells Lactic fermentation lysate

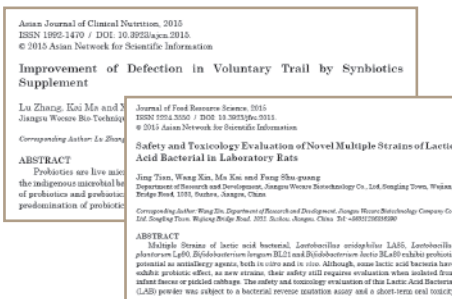

Applications :

Food (Dairy, Beverage, Snacks, etc.) , Healthy and nutritional foods, Pharmaceuticals, Daily products, Environmental protection, Animal husbandry, ODM&OEM.

R & D

- Over 3000 strains bank with independent intellectual property rights;
- Isolated from traditional fermented food or healthy person, strains were identified and preserved by Institute of Microbiology Chinese Academy of Sciences;
- Strains level research in the fields of physiology, biochemistry, identification, safety, efficiency, technology development and application;
- Possess dozens of patented stains and technologies, we published numbers of studies in foreign and domestic core journals;
- 6 big global leading R&D platforms :
 Probiotic screening, identification and preservation center
 Probiotic production research center
 Lactic acid bacteria fermented yoghurt research center
 Probiotic preparation research center
 Probiotic application and development test center
 Probiotic safety and efficacy evaluation center
- Rich probiotic and its derivatives product application solutions, we provide diversified support and services;
- Industry senior experts and leading talents;
- Union with Hong Kong University, Jiang Nan University and China Agriculture University to set up united labs for deepening university-industry collaboration.

Production Capacity

- Annual production of 500 tons of high-active probiotics powder and 5000 tons of probiotic derivatives;
- Purification workshop in line with the drug GMP C grade (part A grade);
- System certifications of FSSC22000, GMP, Kosher and Halal etc.;
- Automatic fermentation control system, advanced high-efficiency separation and enrichment system, subzero vacuum freeze drying system;
- High-quality and multi-standards production systems of powder, granules, tablets, and capsules etc;
- Strong energy sources supply system, two grade pure water preparation system, temperature and humidity control system, dust control system and sewage treatment systems;
- Perfect and precise manufacture process system, personnel management system, facility operating regulations and quality management system.

Quality Management

- Established quality certificated systems of FSSC22000, cGMP, FDA, ISO22000, Kosher and Halal;
- Quality of the whole traceability industry chain management system;
- Key control points and hazard analysis monitoring system;
- Advanced instrument and equipment for raw materials, excipients, package, semi-finished and finished product test and analysis;
- Timely and effective product analysis, recall and treatment system;
- Strict mentoring and managing systems on raw materials and packaging with suppliers;
- Trained and certificated professional quality controllers;
- Influential quality management committee;

Enterprise Certifications
