Guangdong

Equipment Name	CO2 Laser Marking Machine
Specification Type	JGH-103 CO2-10W/ JGH-103 CO2-30W/ JGH-103 CO2-60W/ JGH-103 CO2-150W/ JGH-103 CO2-200W
Brand	Juguangheng
Model of machine	JGH-103
Laser wave length	1064um
Machine Size	L:80cm W:100cm H:150cm(Table With: 65cm)
Output Power	10w/30w/60w/100w/150w/200w
Marking Minimum Character	er 0.3mm
Marking Range	110*110mm, 175*175mm, 300*300mm(optional)
Marking Depth	≤18mm(By materials)
Marking Speed	250 character/s
Optical Quality	<2
Repetition Rate	0kHz- 100kHz
Mark Minimum Line Width	0.12mm
Scope	100x100mm
Cold way	Water / Air-cooled
Power	AC220V/50Hz/2.0kVA(10A-20A)
Total Power Consumption	<1.5KW
The Weight of Main Engine	40KG

ADD: 5 floor of Halian Buildig, NO.6 Dezheng west road, Changan Town,
Dongguan, Guangdong

Dongguan Yangling Electronics Trading Co.,Ltd.

**5 floor of Halian Buildig, No.6 Dezheng west road, Changan Town, Dongguan,
Guangdong**

Product Introduction

Optical system: assembling fleetly and guaranteeing performance .

Using imported high-quality CO2 laser, reflector and focusing lens on the mirror and the mirror scanner; being of high precision, fast speed and stable performance and can meet the requirement of continuous working for a long time.

Air/Water cooling system: stable and carefree.

When using, you should ensure that there is no obstruction around and ventilated smooth; that is the guarantee of the long working period, stable and reliable activity of the laser.

Workbench

Multi-function and high-precision workbench: preloaded high-precision practical multi-functional working table; being with multiple flexibility screw holes on worktable; convenient to install special fixture .

Safe , stable and movable .

There are four large foot cups to ensure the steadiness and the safety of the installation of equipment, and to avoid the environmental impact of the use of the equipment; and four wanxiang wheels would make the equipment handling handy.

Applied Range

A variety of non-metallic materials can be marked; applying widely to graphic engraving on all kinds of material including craft gifts, organic glass, clothes, leather, wood, paper, food packaging, electronic components, PCB, flexible circuit board, ceramic substrate, semiconductor, crystal glass, plastic connector, silicon rubber keys and SMD components.
