Product Catalogue

Shanghai LIQIAN Medical Equipment Co., Ltd

LDF300 Multifunctional Obstetric Examination bed is a novel and innovative gynecological product. It adopts simple structure, convenient operation and good appearance. The set is controlled mainly by an electric footswitch and pushing rod controller, which make it able to tilt, adjust the backrest and seat 35 degree, and turn the feed rack to any degree, while its headrest is manually controlled. The bed mattress is soft and is made of leatheriod, which makes them easy to take off, clean and sterilize. Under the backrest there is also a storage box.
