

## AKP-S PVC Button Aluminum Foil Cable Shielding Sleeve

### Description:

PVC Button Aluminum Foil Cable Signal Shielding Sleeve is made by PVC material and aluminum foil, which can be used for electric wire and cables for neatening, beautifying and EMI shielding. the product can be used repeatedly, and has excellent insulation effect, good flame retardancy.

It's good to be used to modify the wire line and reinstall for the multi-strand wire harnesses. And easy to maintain and service.

### Product application:

AKP-S PVC Button Aluminum Foil Cable Signal Shielding Sleeve is widely used in the neatening, protecting and shielding electric wires and cables of distribution cabinet, computer, TV, high-speed rail, automation equipment, etc.

### Technology parameters:

- 1, Materials: PVC film + Aluminum Foil (0.01mm) + Wire Mesh +Flame retardant Button
- 2, Flame Retardant: UL VW-1
- 3, Ground Material: Tin Plated Copper Wire Mesh
- 4, Thickness: 0.3+/-0.05mm

5, Break down Voltage: 8.5V

6, Continuous Operating Temp.: -15°C~60°C

7, Certification: ROHS

8, Cutting tools: scissors

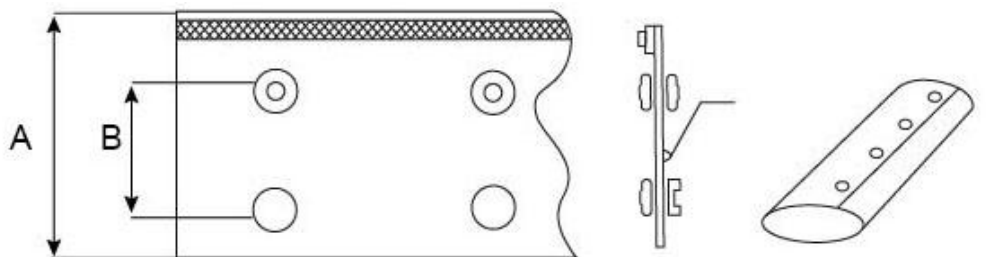

## Usage:

Wrapping the periphery of a protection wire and fastening the buttons one by one

## Functions:

Prevention of electromagnetic wave interface, protection and beautification of wires, convenience in dismounting and repeated use

## Product size chart:
