Indoor transparent glass led display

P3.91 P7.8125 P10 P15.64

The transparent LED display is mainly for advertising. Although it is not waterproof, its brightness could be up to 5000nits or even higher. So the display content will still look very clear even if it is facing sunlight.

Besides good advertising effect, LED glass display also helps lighting the glass wall, thus makes the glass wall more attractive and saving a lot lighting cost.
