

TOP LED:304IRC-131L (3mm through-hole LED- 1310nm IR)

CUSTOMER APPOVED SIGNATURES	SALES	APPROVED	CHECKED	PREPARED
	APPROVED	BY	BY	BY

1. Features

• Color :IR LED

• Lens: Water clear

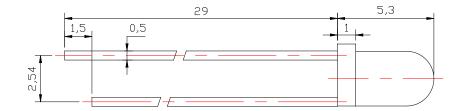

EIA STD Package

• Meet ROHS, Green Product

• Compatible With SMT Automatic Equipment

• Compatible With Infrared Reflow Solder And Wave Solder Process

2. Package Profile & Soldering PAD Suggested

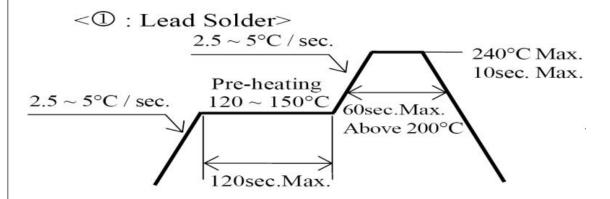

Notes: 1. All dimensions are in millimeters;

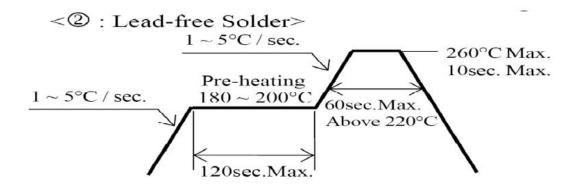

2. Tolerance is \pm 0.10 mm unless otherwise noted.

3. Soldering Profile Suggested

Reflow Soldering			Hand Soldering	
-	Lead Solder	Lead-free Solder		
Pre-heat	120 ~ 150°C	180 ~ 200°C	Temperature	350°C Max.
Pre-heat time	120 sec. Max.	120 sec. Max.	Soldering time	3 sec. Max.
Peak temperature	240°C Max.	260°C Max.	100 100 100 100 100 100 100 100 100 100	(one time only)
Soldering time	10 sec. Max.	10 sec. Max.		
Condition	refer to	refer to		
	Temperature - profile ①.	Temperature - profile ②.		
	**************************************	(N ₂ reflow is recommended.)		

4. Absolute Maximum Ratings At Ta=25℃

Parameter参数	Symbol 符号	Rating 范围	Unit 单位
Power Dissipation at (or below)25℃ Free Air Temperature 25 ℃空气温度极限功耗	Pd	60	mW
Peak Forward Current 峰值正向工作电流 (1/10 Duty Cycle, 0.1ms Pulse Width) 脉冲驱动时极限正向电流0.1MS脉冲宽度	Ifp	200	mA
Continuous Forward Current 连续正向电流	IF	80	mA
Reverse Voltage 反向冲击电压	VR	5	V
Operating Temperature Range 正常使用温度	Topr	-25°C	~ +80°C
Storage Temperature Range 贮藏温度	Tstg	-40°C	~ +80°C
Soldering Condition 可焊接温度	Tsol	Reflow soldering	: 260°C For 3 Seconds
Service life under normal conditions 正常使用条件下寿命	Time		80000h
Service life under normal conditions 正常使用条件下质保	Time		2 years

5. Electrical Optical Characteristics At Ta=25℃

Parameter	Symbol	Min.	Тур.	Max.	Unit	Condition	
Radiant Intensity 辐射强度		2		5	mW/sr	IF=20mA	
	Ee	15		30		IF=80A	
			168			IF=1A Pulse Width≤100us Duty≤1%	
Viewing Angle 发光角度	201/2		20		deg	IF=80mA	
Peak Wavelength 峰值波长	λр	1250	1300	1350	nm	IF=80mA	
Spectral Bandwidth 光谱带宽	Δλ		50		nm	IF=80mA	
	VF	0.9	1.2	1.4	V	IF=20mA	
Forward Voltage 正向电压降			1.3	1.7		IF=80mA	
			1.5	2.2		IF=1A Pulse Width≤100us Duty≤1%	
Reverse Current 反向电流	IR			5	uA	VR=5V	
Optical Rise Time 光学上升时间	T_R		25		ns	IF=80mA	
Optical Fall Time 光学下降时间	T_{F}		13		ns	IF=80mA	

Notes: 1. Luminous intensity is measured with a light sensor and filter combination that approximates the CIE eye-response curve.

- 2. θ 1/2 is the off-axis angle at which the luminous intensity is half the axial luminous intensity.
- 3. The dominant wavelength, λd is derived from the CIE chromaticity diagram and represents the single wavelength which defines the color of the device.

6. Reliability Test

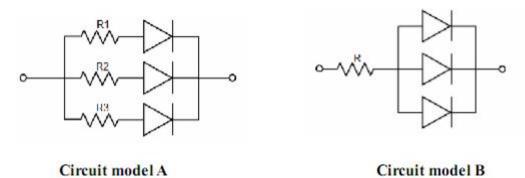

Classification Test Item		T + C 1'-	D.C. C. 1.1	Reference
		Test Condition	Reference Standard	Standard
Operation Life		Ta= Under Room Temperature As Per Data Sheet Maximum Rating	1000HRS (-24HRS,+72HRS)*@20mA	MIL-STD-750D:1026 MIL-STD-883D:1005 JIS C 7021:B-1
	High			
Endurance Test High Humidity Storage High Temperature Storage Low	Humidity	IR-Reflow In-Board, 2 Times Ta= 65±5°C,RH= 90∼95%	240HRS±2HRS	MIL-STD-202F:103B JIS C 7021:B-11
	High Temperature	Ta= 105±5°C	1000HRS (-24HRS,+72HRS)	MIL-STD-883D:1008 JIS C 7021:B-10
	Temperature	Ta= -55±5°C	1000HRS (-24HRS,+72H RS)	JIS C 7021:B-12
Temperature Cycling Thermal Shock Solder Resistance Environmental Test IR-Reflow Normal Process IR-Reflow Pb Free Process	•	105° C ~ 25° C ~ -55° C ~ 25° C 30mins 5mins 30mins	10 Cycles	MIL-STD-202F:107D MIL-STD-750D:1051 MIL-STD-883D:1010 JIS C 7021:A-4
		IR-Reflow In-Board, 2 Times $85 \pm 5 ^{\circ}\text{C}$ ~ $-40 ^{\circ}\text{C}$ $\pm 5 ^{\circ}\text{C}$ 10mins 10mins	10 Cycles	MIL-STD-202F:107D MIL-STD-750D:1051 MIL-STD-883D:1011

	Ramp-up rate(183 °C to Peak) +3 °C / second max Temp. maintain at 125(±25) °C 120 seconds max Temp. maintain above 183 °C 60-150 seconds Peak temperature range 235 °C+5/-0 °C Time within 5 °C of actual Peak Temperature (tp) 10-30 seconds Ramp-down rate +6 °C/second max		MIL-STD-750D:2031. J-STD-020C	
		Ramp-up rate(217 °C to Peak) +3 °C / second max Temp. maintain at 175(±25) °C 180 seconds max Temp. maintain above 217 °C 60-150 seconds Peak temperature range 260 °C+0/-5 °C Time within 5 °C of actual Peak Temperature (tp) 20-40 seconds Ramp-down rate +6 °C/second max		MIL-STD-750D:2031. J-STD-020C
	Solderability	T.sol= 235 ± 5 °C Immersion rate 25 ± 2.5 mm/sec Coverage ≥ 95 % of the dipped surface	Immersion time 2±0.5 sec	MIL-STD-202F:208 MIL-STD-750D:202 MIL-STD-883D:200 IEC 68 Part 2-20 JIS C 7021:A-2

7. Cautions

Application

- 1. A LED is a current-operated device. The slight shift of voltage will cause big change of current, which will damage LEDs. Customer should use resistors in series for the Over-Current-Proof.
- In order to ensure intensity uniformity on multiple LEDs connected in parallel in an application, it is
 recommended to use individual resistor separately, as shown in Circuit A below. The brightness of each
 LED shown in Circuit B might appear difference due to the differences in the I-V characteristics of those
 LEDs.

3. High temperature may reduce LEDs' intensity and other performances, so keeping it away from heat source to get good performance is necessary.

Storage

1.Before opening original package, it is recommended to store them in the following environment:

Temperature: 5°C~30°C Humidity: 85%RH max.

- 2. After opening original package, the storage ambient for the LEDs should be in 5~30°C temperature and 60% or less relative humidity.
- 3. In order to avoid moisture absorption, it is recommended that the LEDs that out of the original package should be stored in a sealed container with appropriate desiccant, or in desiccators with nitrogen ambient.
- 4. The LEDs should be used within 168hrs (7 days) after opening the package. Once been mounted, soldering should be quick.
- 5. If the moisture absorbent material (silica gel) has faded away or the LEDs stored out of original package for more than 168hrs (7 days), baking treatment should be performed using the conditions: 60°C at least 24 hours.

ESD (Electrostatic Discharge)-Protection

A LED (especially the Blue. White and Green product) is an ESD sensitive component, and static electricity or power surge will damage the LED. ESD-damaged LEDs will exhibit abnormal characteristics such as high reverse leakage current, low forward voltage, or "no light-up" at low currents, etc. Some advice as below should be noticed:

- 1. A conductive wrist strap or anti-electrostatic glove should be worn when handling these LEDs.
- 2. All devices, equipment, machinery, work tables and storage racks, etc. must be properly grounded.

- 3. Use anti-static package or boxes to carry and storage LEDs. And ordinary plastic package or boxes is forbidden to use.
- 4. Use ionizer to neutralize the static charge during handling or operating.
- 5. All surfaces and objects within 1 ft close to LEDs measure less than 100V.

Cleaning

Use alcohol-based cleaning solvents such as IPA (isopropyl alcohol) to clean LEDs if necessary.

Soldering

- 1. Soldering condition refer to the draft "Soldering Profile Suggested" on page 1.
- 2. Reflow soldering should not be done more than 2 times.
- 3. Manual soldering is only suggested on repair and rework. The maximum soldering temperature should not exceed 300°C within 3 sec. And the maximum capacity of soldering iron is 30W in power.
- 4. During the soldering process, do not touch the lens at high temperature.
- 5. After soldering, any mechanical force on the lens or any excessive vibration shall not be accepted to apply, also the circuit board shall not be bent as well.

Others

- 1. The LEDs described here are intended to be used for ordinary electronic equipment (such as office equipment, communication equipment and household applications). Consult BYT's Sales in advance for the applications in which exceptional reliability is required, particularly when the failure or malfunction of the LEDs may directly jeopardize life or health. (such as in aviation, transportation, traffic control equipment, medical and life support systems and safety devices).
- 2. The light output from the high luminous intensity LEDs may cause injury to human eyes when viewed directly.
- 3. The appearance and specifications of the product may be modified for improvement without prior notice.
