

# New Intelligent audio brightness uniformity tester QA-4030-TZ

## 8. Intelligent audio brightness uniformity tester QA-4030-TZ

QA-4030-TZ

Intelligent audio brightness uniformity tester

### FEATURES

The device provides a test environment for the work pieces' luminance index, you can find & identify the work pieces' luminance index whether it is normal through the imaging capture. The instrument can measure optical components such as transmittance, uniformity, Chroma and other video measuring Optical index test ,The Bottom backlight Provide light for the membrane,use the Imaging color meter measure the surface of light permeability components, can measure the transmittance, uniformity, Chroma, color and other optical indicators.
