Antirust & Rust Preventative Additive Package T2202

■Product Introduction

T2202 is a kind of compound additive developed for rustproof of metal surface based on the most advanced formula technology. It is compounded with various high quality rust preventative, corrosion inhibitor and film forming agent. Matching with different base oils, the product can formulate displacing type rust preventive oil, thin-film antirust oil, soft-film antirust oil, lubricating antirust oil in appropriate base oil or the mixture of solvent oil and base oil, with excellent anti-rust and anti salt spray effect.

■Product Usage

Dosage	Salt Spray Level (A)
12	48h
15	72h
20	168h

■Product Typical Values

Item	Quality Index	Test Method
Appearance	Brown transparent liquid	Visual inspection
Density, 20°C, g/cm ³	Actual measurement	GBT1884
Flash point (open) / °C no less than	160	GBT 3536
100°C kinematic viscosity (mm ² /S)	16-18	GBT 265

■Packing & Storage

Refer to SH/T0164 for storage, handling and oil blending. The highest temperature of this product shall not exceed 75°C, and shall not exceed 45°C if stored for a long time. This product is non-flammable, non-explosive and non-corrosive. In terms of safety, environmental protection and use, it is the same as general petroleum products without special protection. For skin contact, wash thoroughly with detergent, soap and water.

Packing: 200L standard galvanized iron drum, 180 kg/drum net weight.
