Pipe centralized granulator

片材在线粉碎机RG-21QX
Sheet on-line granulator

块料撕碎机RG-22SS
Block single shaft shredder

管材粉碎机，专为长尺寸管材和型材设计，较低的喂料口，更是适合长尺寸材料的喂料。

片材在线粉碎机，专为片材挤出及压塑生产过程中产生的边角料回收而设计，可自动进行喂料且回收材料可投入生产线再利用。

块料撕碎机专为回收注塑和吹塑行业的中小型块料而设计，如机头料，通过撕碎机粗粉碎再通过粉碎机进一步粉碎后重新回到生产线。

Description:

Pipe centralized granulators are mainly used to directly granulate the PVC and PE tubings, PVC sectional and profiled bar. The machine is applicable for crushing long pipes and profiles.

Sheet on-line granulators are mainly used for plastic edges recycling system during producing in the process of sheet extrusion and compression molding. This kind of granulator can feed material automatically into cutting chamber and conveying the regrind material back to production line.

Block single shaft shredders are mainly used to crush sprue, head material, block from injection molding machine or blow molding machine. After shredding into Dia40mm material, recrushed into Dia12mm by granulators. Special design to ensure the material out of pollution and overheat.
