

SG Industry (HongKong) Co.,Ltd

Company History

Founded in April 2007, SG Industry (HongKong) Co., Ltd mainly focuses on the production of precision machining parts (Lathing, Milling, Drilling, Grinding, Chamfering etc.).

SGI's market is involved in Japan, the United States and many European countries. In the past years, SGI has been aiming at the goal "to provide clients with qualified, fast, affordable and good service" and has been serving more than 150 customers, including the famous Panasonic, Toshiba, Sanyo, Casio, Omron, Aisin, Denso, etc.

We pay much attention to the QC and delivery time to meet your requirement.

Case Study for Some Products

Currently we are mainly dealing with the parts for equipment, workholding, mould and CNC precision. We have stably cooperated with our overseas customers and have well known our clients' request in Q(quality), C(cost), D(delivery) and S(service). Our QC standard and products are highly approved by many of our Japanese customers.

If needed, laser-printing, clear/black anodizing, zinc plating, chrome plating, electroplating and nitriding service are available.

Our Production Equipment

Processing Department

CNC Machining Center

Lathing Machine

Milling Machine

Grinding Machine

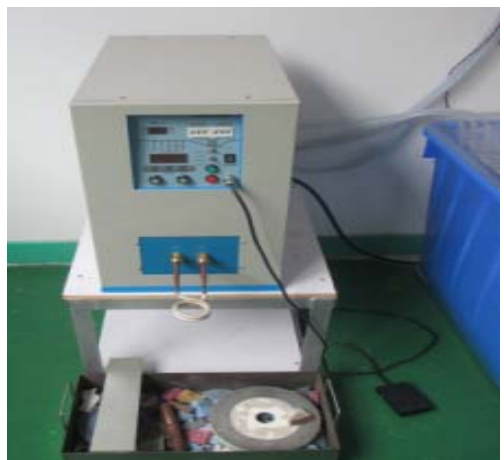

Wire-cutting Machine

Drilling/Tapping Machine

Sawing Machine

Hi-frequency Thermal Processor

Our QC Equipment

QC Office 1/3

QC Office 2/3

QC Office 3/3

Material Available:

Steel: Carbon steel/stainless steel/alloy steel/tool steel/die steel/High-speed steel

Aluminum: Alumina/casting aluminum/deformed aluminum

Copper/brass/bronze

Resin: Polyethylene/nylon/epoxy/Teflon/propylene/POM/ABS/PEEK/Bakelite

Iron

Testing Equipment

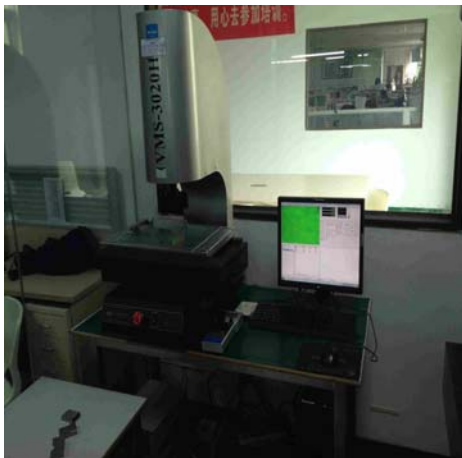

Spectrograph

CMM

Automatic 2D Altimeter

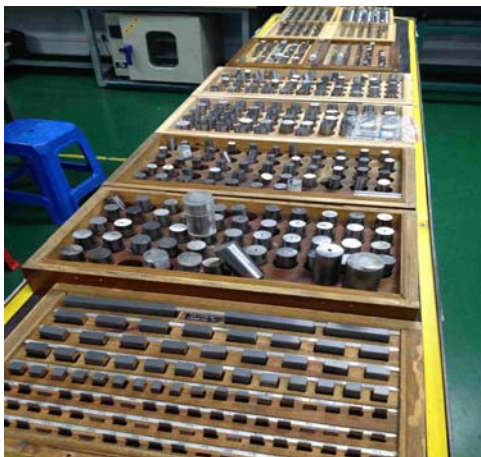

Automatic Image Measuring Equipment

Screw Plug Gauge, Ring Gauge

Test Tools

Block Gauge

Hardness Tester

Ultrasonic Hardness Tester

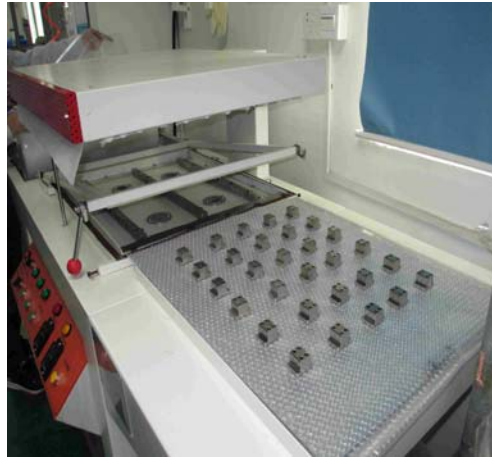

Surface Roughness Measuring Instrument

Packing

Individual PE bag is the normal packing.
Blister packing is available according to your need.
The IR drawing will be attached with the packing.
Enough form will be covered with the parts.
Packing is safe for long-distance delivery.
