

Thickness: From 0.3mm to 7.0mm are in stock

HOBBY CARBON

CARBON FIBER PLATE

This is pure carbon fiber sheet. Carbon fiber plates are fabricated with multiple layers of high strength carbon fiber prepared using a high pressure, which are widely used in Aviation, Drone, DIY etc. Because they are high strength, light weight, wear-resisting, Corrosion Resistant etc. Our Quasi-isotropic plate, 100% carbon fiber sheets, carbon glass sheets and G10 glass fiber sheets are designed for use in constructing high performance structures and are easy to cut, drill and assemble.

Twill/Plain, Matte/glossy finish are available.

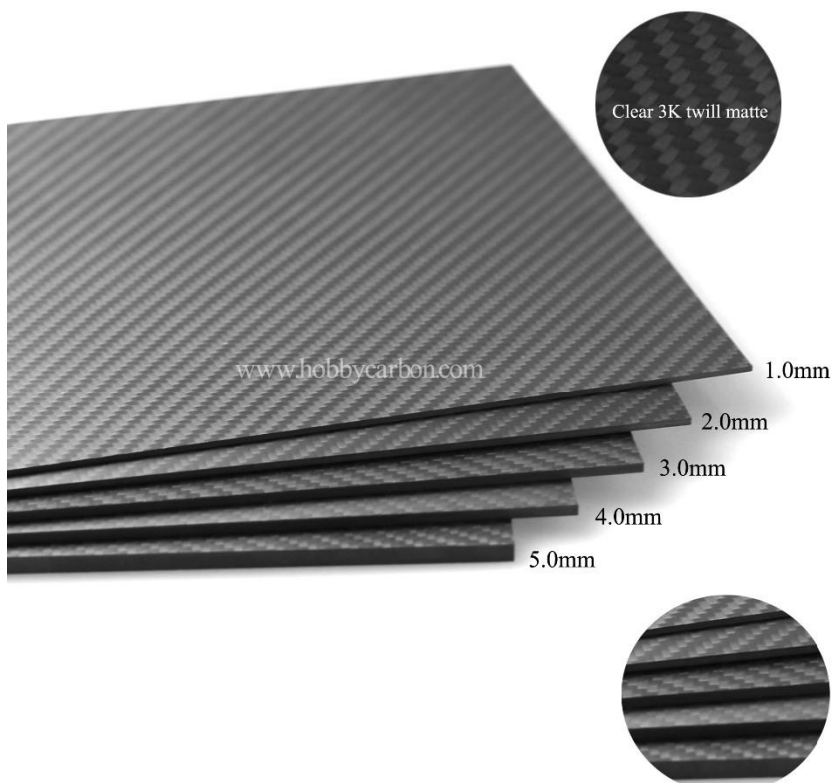

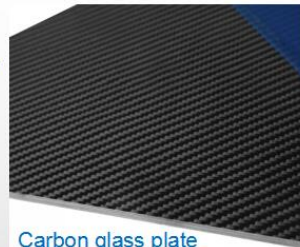

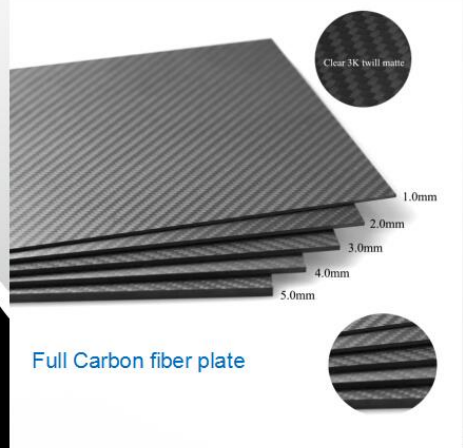

CARBON FIBER PLATE

Carbon fiber plates

Material:full carbon fiber , carbon glass,G10

Surface:3K twill matte,twill glossy,plain matte,plain glossy

Thickness:0.3mm,0.5mm,1.0mm to 7.0mm are available

PRODUCT

DISCRIPTION

Brand: HOBBY CARBON

Material: CARBON FIBER

Dimensions: 400mm*500mm

Thickness: 0.3mm-7.0mm

Weight: depending

Shape: carbon plate

Finish: glossy or matte

Weave: twill or plain

C Content(%):100%

Place of origin:

China(mainland)

SERVICE

' Customized size and shape are available as well.We could offer CNC cutting service including regular cutting, countersinking and chamfers etc with beautiful surface and high precision.

Just enter your request in the Request Special Services section on the product page when interesting in a product, and pricing will be emailed for approval.

Our products

Aluminum nuts: any colors, and 3 types

Screws: aluminum, stainless steel, steel; with 3 types head

Standoffs: aluminum, nylon with 3 types head
