

HGY-AD High Temp. Resistance High Silica Self-adhesive Tape

Description

HGY-AD High silica self-adhesive tape is made by silicon dioxide fiber which's purity is up to 96%. Backing adhesive design make it stick on the pipe and equipment perfectly. It can also coat on the special-shape pipe and equipment well. Have excellent effect of high temperature resistance and heat prevention.

Application

1, HGY-AD High silica self-adhesive tape can work at high temperature environment (under 1000 °C) for a long time. High temperature resistance is excellent. With pressure type backing adhesive, easier to install. The pressure backing adhesive will resolve in high temperature environment, can cover the soft hose, cable and pipeline tightly and perfectly. It suitable for the working condition of complicated pipeline and difficult teardown.

2, HGY-AD high silica self-adhesive tape applies to cables of metallurgy, electric power, coal and high temperature working condition industries for protection. Ensure the operation safety and smoothly.

Standard Size:

PART NO.	Width (mm)	Thickness (mm)	Length (m/roll)
HTHS-T-A-25	25	0.7,1.3	10
HTHS-T-A-50	50	0.7,1.3	10
HTHS-T-A-100	100	0.7,1.3	10
