

Cotton Cake Filter Press For Metallurgy Industry

Our company produces various models of recessed filter press and plate-frame mechanical filter press, hydraulic filter press, membrane filter press and full-automatic filter press and filter press spare parts. And membrane filter press has received a very good reputation.

Advantage

- 1.Short working cycle and high efficiency.
- 2.Big capacity. Unique plate design makes filtrate discharge more smoothly to make higher processing capacity.
- 3.Good filtering performance. Our filter press can endure higher feeding pressure, so that get lowest cake moisture.
- 4.Low running cost. According to CE standard, our filter press has remarkable performance to decrease the running cost.
- 5.Filter plate are made of reinforced polypropylene with features of high strength, corrosion resistance, nontoxic and odorless.
- 6.According to your material we will recommend special filter cloth, which can improving the filtering accuracy and efficiency .
- 7.Main beam material is Q235B/Q345B, with sand blasting processing.
- 8.Hydraulic station adopt ABB motor ensure stable performance.
- 9.Hydraulic squeezing ensures no leakage to avoid secondary pollution.
- 10.Cabinet elements adopts international famous brands: Siemens Schneider etc.
