

PV021-1-D Eames lounge chair with ottoman of Premium version

The **overall measurements and reclining degree for Eames lounge chair with ottoman** is same with original HM chair. When seated, the chair back would be more reclining and comfortable and feature with **slight swing**. This is just like the original chair and give the chair extra comfort. It is a very special design detail which most copies of Eames lounge chair do not have.

The **armrest cushions** of Eames lounge chair are placed inside with steady steel panel instead of plywood to make the shape thinner and curve elegant. **Leather buttons** are attached in same way with original chair, safe and tight. The **wrinkles** around the buttons are in a natural and nice way.

The **plywood material** for Eames lounge chair with ottoman (PVO21-1) is carefully selected by experienced craftsman before production. Available with Palisander or walnut or cherry finish in same shape and curve with original Herman Miller Design. Thinner than before but stronger. There is minimal black wood knot in the edge of plywood shell. After taking off the cushions, you could find the inside of wood shell **also finished with veneer**. This makes the chair in a very high end of luxury furnishing.

All cushions include armrest, headrest, back, and seat are made in **PU foam** of high resilient and durable for years. Both the shape and size are made according to original design. The seat and back and headrest **cushions are removable**. But the chair cushions would be assembled when packing.

The complete metal base for the chair and ottoman is developed in **brand new mold** exactly based on the original design. The backside of seat and back cushions are backing with high resilient rubber panel and zip system. The air holes in the panel make the cushions recovering shape immediately after seated.

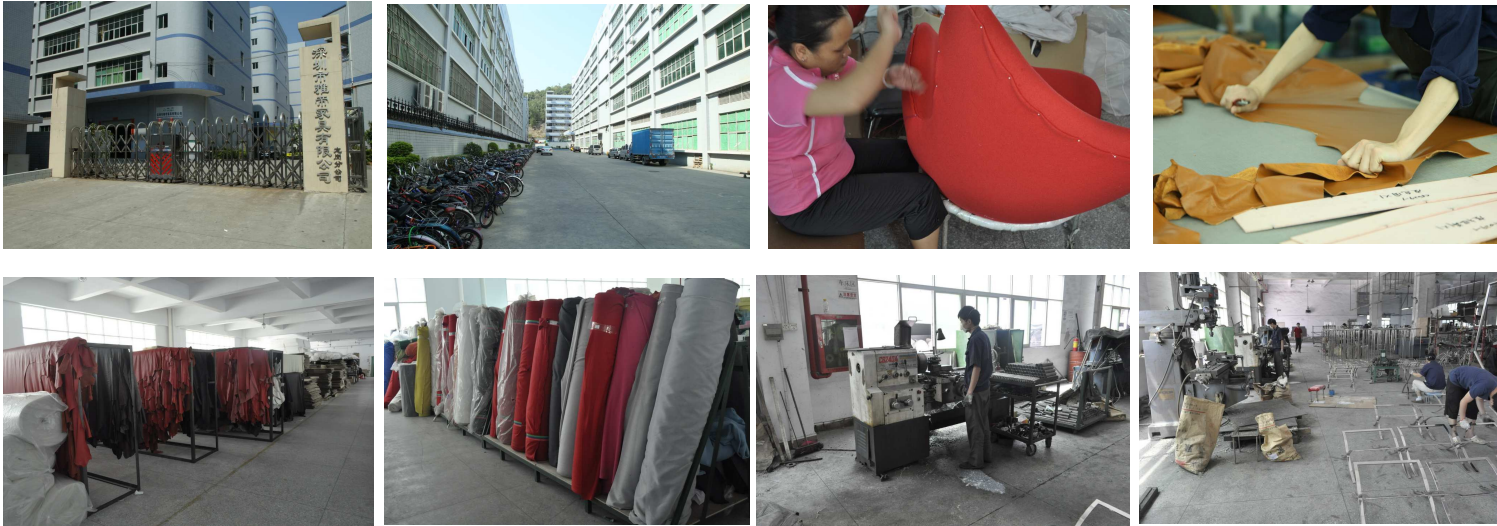

Modern Classic furniture reproduction at 1:1 against originals
